# ONE-SIZE PEDIATRIC bébé Vie<sup>™</sup>

Patented one-size pediatric bébé Vie Scope<sup>™</sup> is a self-contained, battery-powered, disposable laryngoscope for intubating toddlers to ten years.

## WHY CHOOSE BEBE VIE<sup>™</sup> FOR PEDIATRIC INTUBATION?

- ✓ Illumination of the vocal cords with minimal chance of light obstruction by secretions or blood
- ✓ Users can directly intubate children with an age-appropriate endotracheal tube using a 'sideways' insertion technique
- ✓ Users can insert the tip of the bébé Vie Scope<sup>™</sup> in the vallecula similar to a Macintosh laryngoscope
- ✓ Use the blade tip to elevate the epiglottis akin to a Miller laryngoscope.
- ✓ The bébé Vie Scope<sup>™</sup> can also be used as a bougie introducer

Disposable, Single-  
Use Device

Clear Line of  
Sight

Patented LED  
Light Illumination  
of the Throat

Easy to Use

**WHEN IT MATTERS  
MOST, TRUST  
bébé Vie<sup>™</sup>**
